OVERVIEW OF SDGS IMPLEMENTATION IN INDONESIA & USING SUSENAS IN MEASURING WASH SDGS INDICATORS

*International Workshop on Sustainable Development Goal (SDG) Indicators, 26-28 June 2018
Beijing, China*

**SUSTAINABLE
DEVELOPMENT**

GOALS

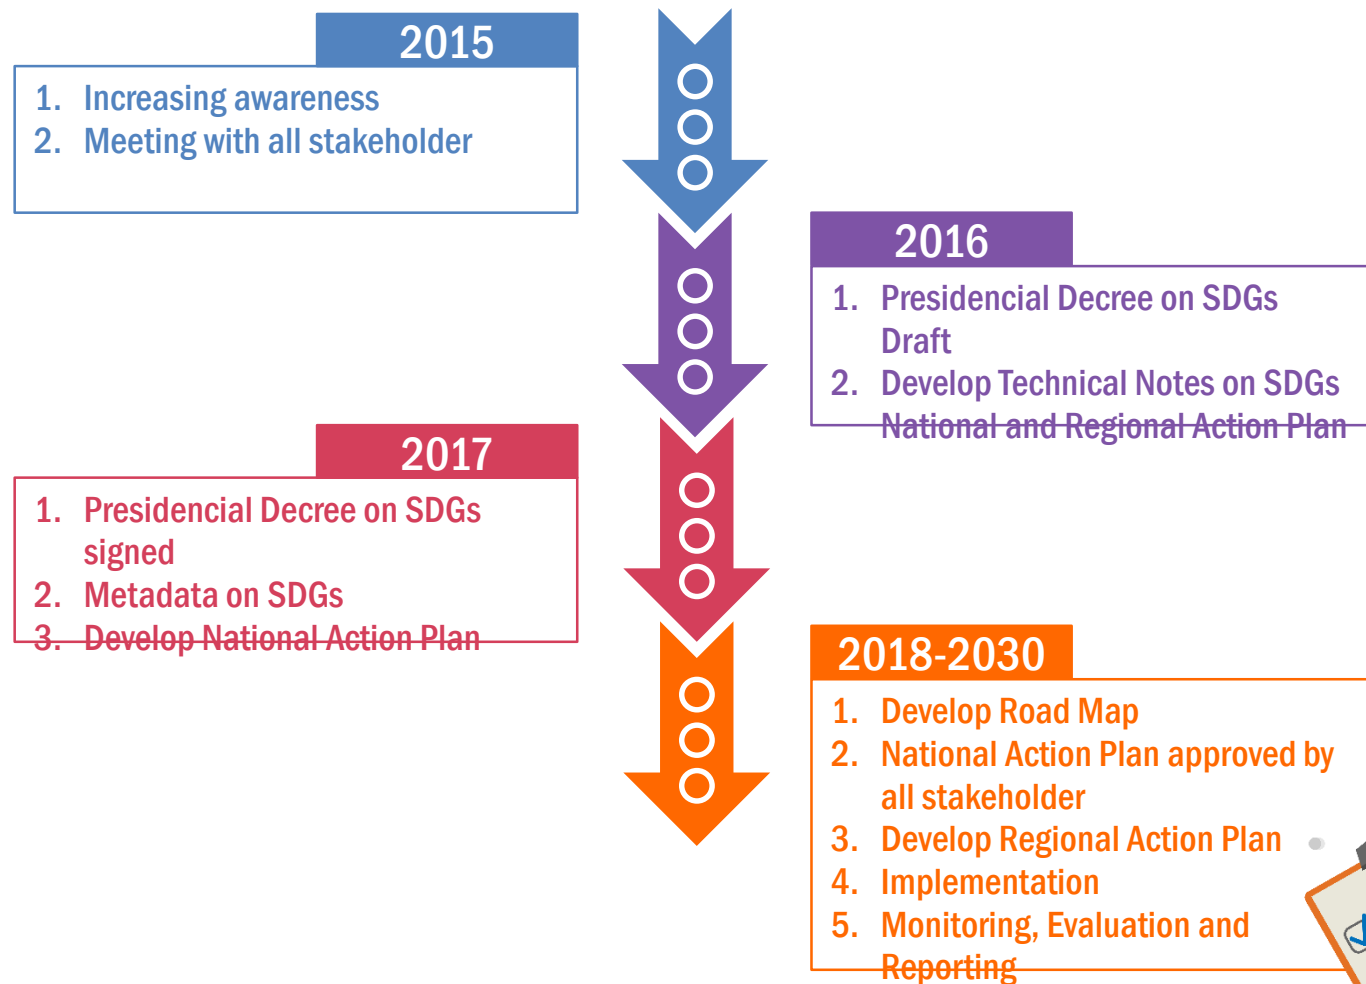

Henri Asri Reagan

Henri_reagan@bps.go.id

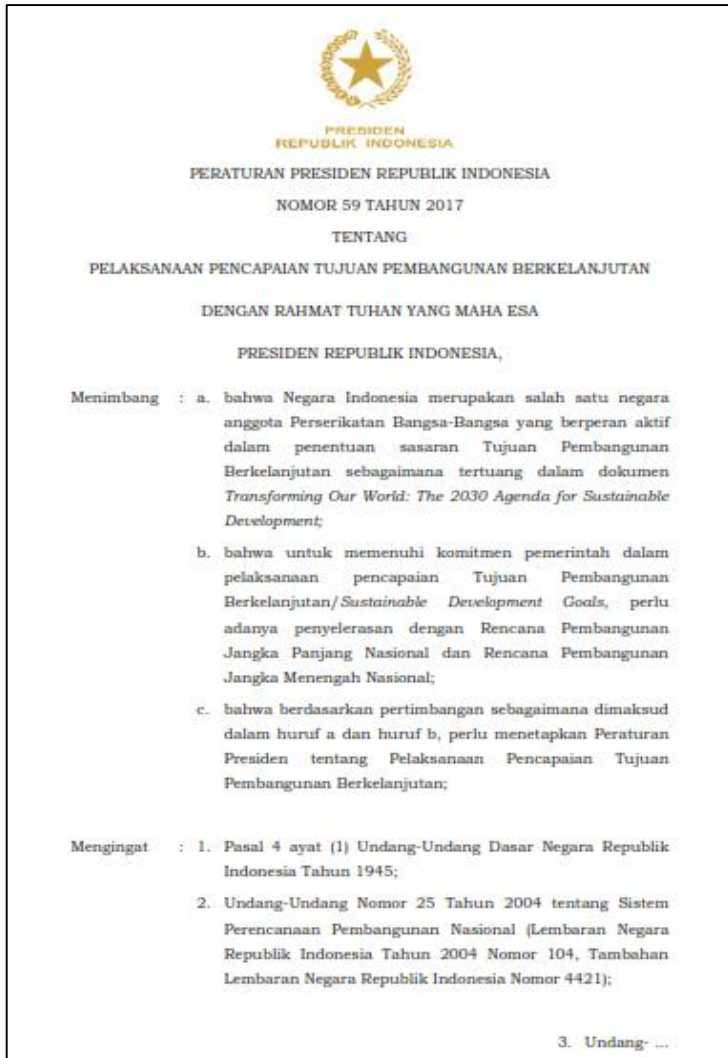

Initial plan in localizing SDGs in Indonesia

Legal Basis of SDG Implementation In Indonesia

Presidential Decree No. 59/2017 on SDGs

As the legal basis to integrate SDGs into the national development plans

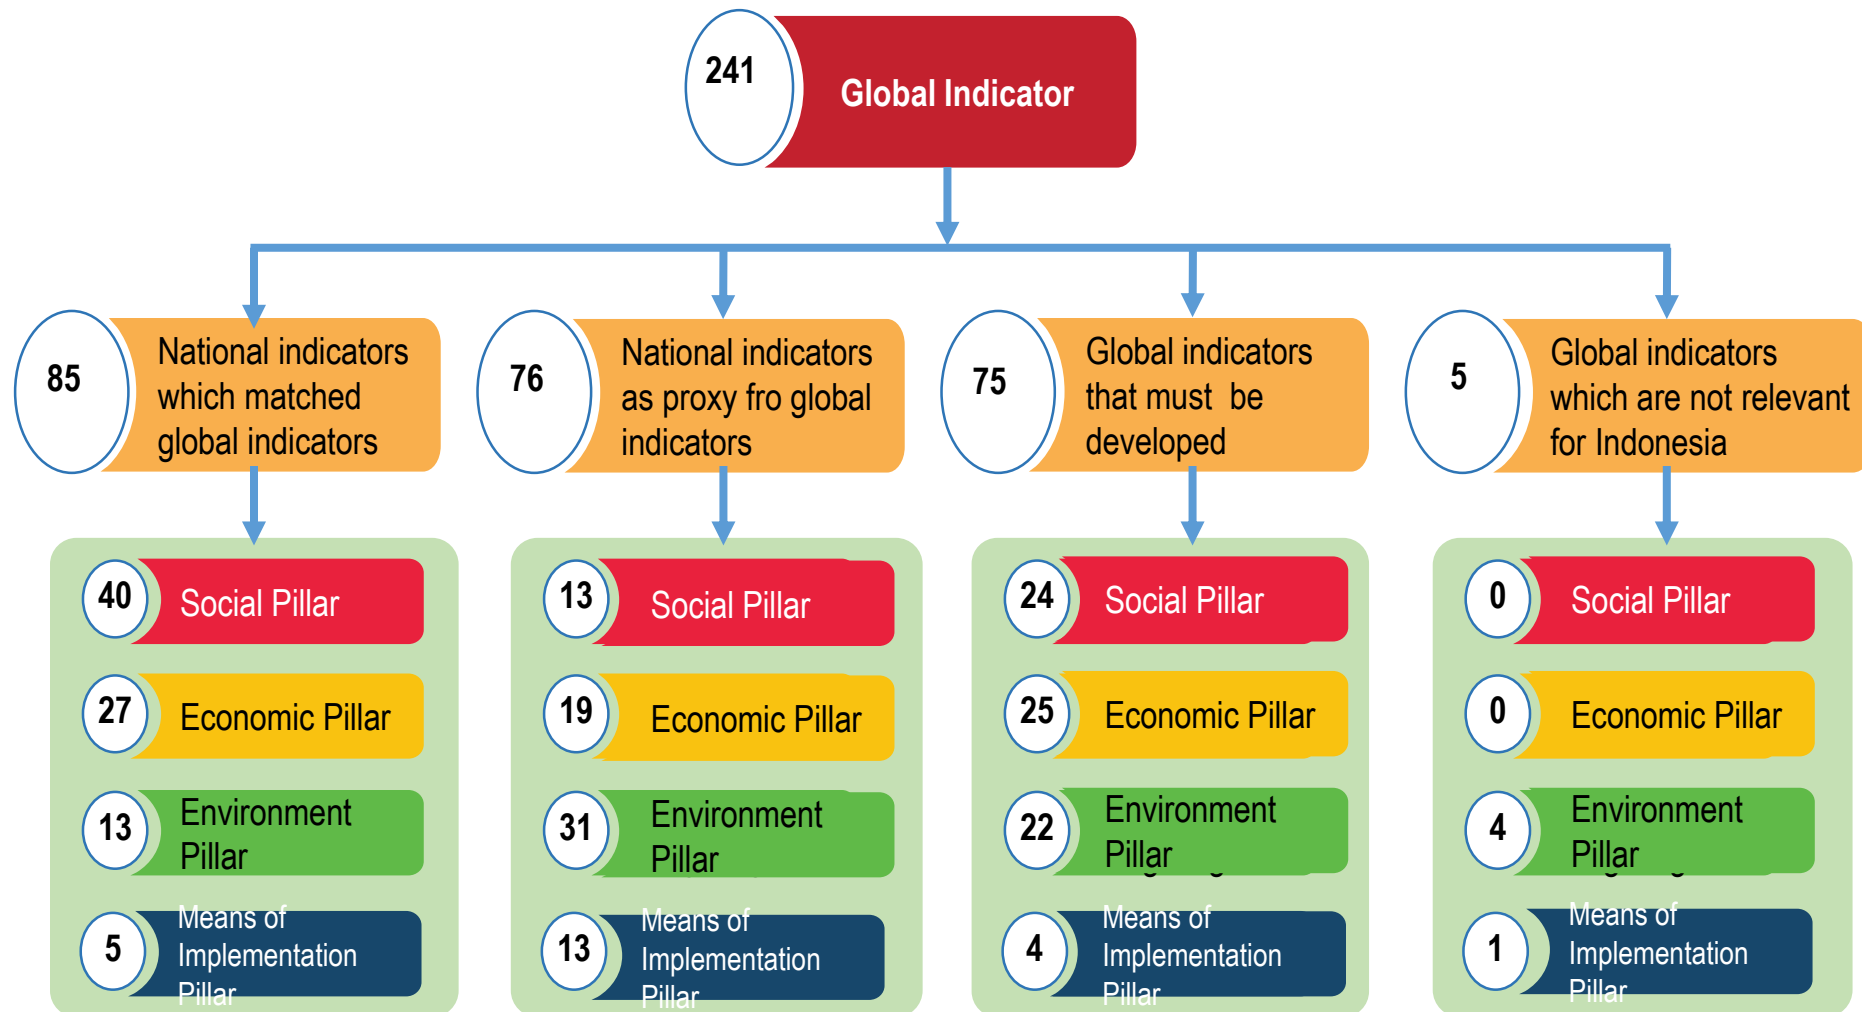

- National Long Term Development Plan (RPJPN) 2005-2025
- National Medium Term Development Plan (RPJMN) 2015-2019

To give clear instruction of the SDGs implementation framework in Indonesia

- Definition and target of SDGs;
- Role of ministries and institutions;
- National coordination plan and procedures;
- Involvement of stakeholders;
- Evaluation, reporting and budget;
- Goals and Target of SDGs.

Mapping availability of global SDG indicators

Examples of Proxy Indicators

Indicator No.	Global Indicator	Proxy Indicator
4.2.2	Participation rate in organized learning (one year before the official primary entry age)	4.2.2 (a) Proportion of children aged 3-6 years participating in early childhood education
6.1.1	Proportion of population using safely managed drinking water services (%)	6.1.1 (a) Proportion of households having access to clean/decent drinking water (%)
6.2.1	Proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water	6.2.1(a) Proportion of population having access to hand-washing facility with soap and water
		6.2.1(b) Proportion of households having access to proper sanitation
		6.2.1(c) Number of villages implementing the program of Community Based Sanitation
		6.2.1(d) Number of villages with Open Defecation Free
		6.2.1(e) Proportion of households being serviced by the centralized waste water management system
6.6.1	Change in the extent of water-related ecosystems over time	6.6.1(a) Number of lakes with improved water quality
		6.6.1(b) Number of lakes with a silting of less than 1%
		6.6.1(c) Number of lakes with a reducing level of erosion
7.2.1	Renewable energy share in the total final energy consumption (%)	7.2.1(a) Proportion of biomass supply

These global indicators are not available in Indonesia

Examples of Proxy Indicators

No.	Global Indicator	Proxy Indicator
11.6.1	Proportion of urban solid waste regularly collected and with adequate final discharge out of total urban solid waste generated, by cities (%)	11.6.1(a) Estimates of waste production in capital city of 34 provinces (000 meter cubic)
		11.6.1(b) Estimates of transported waste in capital city of 34 provinces (000 meter cubic)
		11.6.1(c) Percentage of managed waste in capital city of 34 provinces (000 meter cubic)
14.5.1	Coverage of protected areas in relation to marine areas (%)	14.5.1(a) Area of marine conservation (Ha)
16.2.1	Proportion of children aged 1-17 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month (%)	16.2.1(a) The proportion of households with children aged 1-14 years who experienced physical punishment and /or psychological aggregation of caregivers in the past month(%)
16.5.1	Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months (%)	16.5.1(a) Perception of Anti Corruption Index

These global indicators are not available in Indonesia

Indonesia Already Prepared by BPS-Statistics
Indonesia

BPS Role in Supporting SDGs

National Socio Economic Survey / SUSENAS

300.000

Household samples
from

34 province

and

**514 cities
in Indonesia**

Susenas collected data (1)

x

- Demography and national ID number;
- Migration and birth certificate;
- Education;
- Crime victim;
- Information and Communication Technology;
- Bank account/saving ownership;

March

- Employment;
- Functional disorder;
- Health eq. health insurance, health problem, outpatient etc.;
- Birth control;

- Acces on food;
- Housing;
- Social Protecion Perlindungan Sosial;
- Acces on financial Service ;
- Ownership of selected goods ; and
- Source of income.

Susenas collected data (2)

X

**March &
September**

- Quantity and value of food, drink and cigarettes consumption for the last week, covers 188 commodity;

- Consumption of non food item for the past month or the last year (in Rupiah);
- Information on income and non consumption spending for the last year.

No Poverty

End Poverty in all its forms everywhere

GOAL 1

1 NO POVERTY

Target:

By 2030, reduce at least by half the proportion of men, women, and children off all ages living in poverty in all its dimensions according to national definitions

Indicator 1.2.1: Proportion of population living below the national poverty line by sex and age

By Sex

By Age

By Area Type

SUB NATIONAL

The biggest: Papua, West Papua and East Nusa Tenggara

The lowest: Jakarta, Bali, and South Kalimantan

ENSURE HEALTHY LIVES AND PROMOTE WELL-BEING FOR ALL AT ALL AGES

GLOBAL INDICATOR

PROPORTION OF BIRTHS ATTENDED BY SKILLED HEALTH PERSONNEL

GLOBAL INDICATOR

TOBACCO USE AMONG PERSONS AGED 18+

Global Targets

Ensure Inclusive and Equitable Quality Education and Promote Lifelong Learning Opportunities for All

National Indicators

- ✓ Literacy Rate
- ✓ Gross Enrollment Rate (GER) in Early Childhood Care and Education Programs

DISSAGREGATION DATA

LITERACY RATE, 2017

	15 years old & above	15-24 years old	15-59 years old
Urban	97,57	99,91	99,13
Rural	93,11	99,36	96,51
Male	97,25	99,67	98,59
Female	93,76	99,65	97,27
40% bottom	92,57	99,47	96,64
20% upper	98,66	99,80	99,29
Migrant Recent	99,16	99,95	99,53
Non Migrant	95,32	99,64	97,84
Total	95,50	99,66	97,93

GER IN EARLY CHILDHOOD CARE AND EDUCATION PROGRAMS (3-6 YEARS OLD), 2017

Urban	36,43
Rural	31,08
Male	33,21
Female	34,50
40% bottom	30,17
20% upper	42,53
Total	33,84

Goal 5

Achieve gender equality and empower all women and girls

Targets

- 5.2 Eliminate all forms of violence against all women and girls in the public and private spheres
- 5.3 Eliminate all harmful practices on women
- 5.B Enhance the use of enabling technology, to promote the empowerment of women

VIOLENCE AGAINST WOMEN

Indicator 5.2.1

9,4%

Urban	10,38
Rural	8,14
< = Junior High School	9,3
Senior High School +	10,5
Working	8,1
Unemployment	11,0

WASH INDICATORS FROM SUSENAS

Indicator No.	Global Indicator	Proxy Indicator
6.1.1	Proportion of population using safely managed drinking water services (%)	6.1.1 (a) Proportion of households having access to clean/decent drinking water (%)
6.2.1	Proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water	6.2.1(a) Proportion of population having access to hand-washing facility with soap and water
		6.2.1(b) Proportion of households having access to proper sanitation
		6.2.1(c) Number of villages implementing the program of Community Based Sanitation
		6.2.1(d) Number of villages with Open Defecation Free
		6.2.1(e) Proportion of households being serviced by the centralized waste water management system

6.1.1 (a) Proportion of households having access to clean/decent drinking water (%)

Concept & Definition:

Clean/decent drinking water is protected drinking water including tap water, public taps, public hydrants, water terminals, rainwater reservoirs or springs and protected wells, drilled wells or pump wells, a distance of at least 10 meters from sewerage, waste collection and waste disposal.

Data Source:

National Socio-economic Survey KOR / Susenas KOR - BPS

Formula

$$P\ AML = \frac{JRTAML}{JRT} \times 100\%$$

Keterangan:

- P AML : Percentage of households with access to decent drinking water services.
JRTAML : Number of households with access to decent drinking water sources.
JRT : The total number of households.

6.1.1 (a) Proportion of households having access to clean/decent drinking water (%)

Question in Susenas Questioner

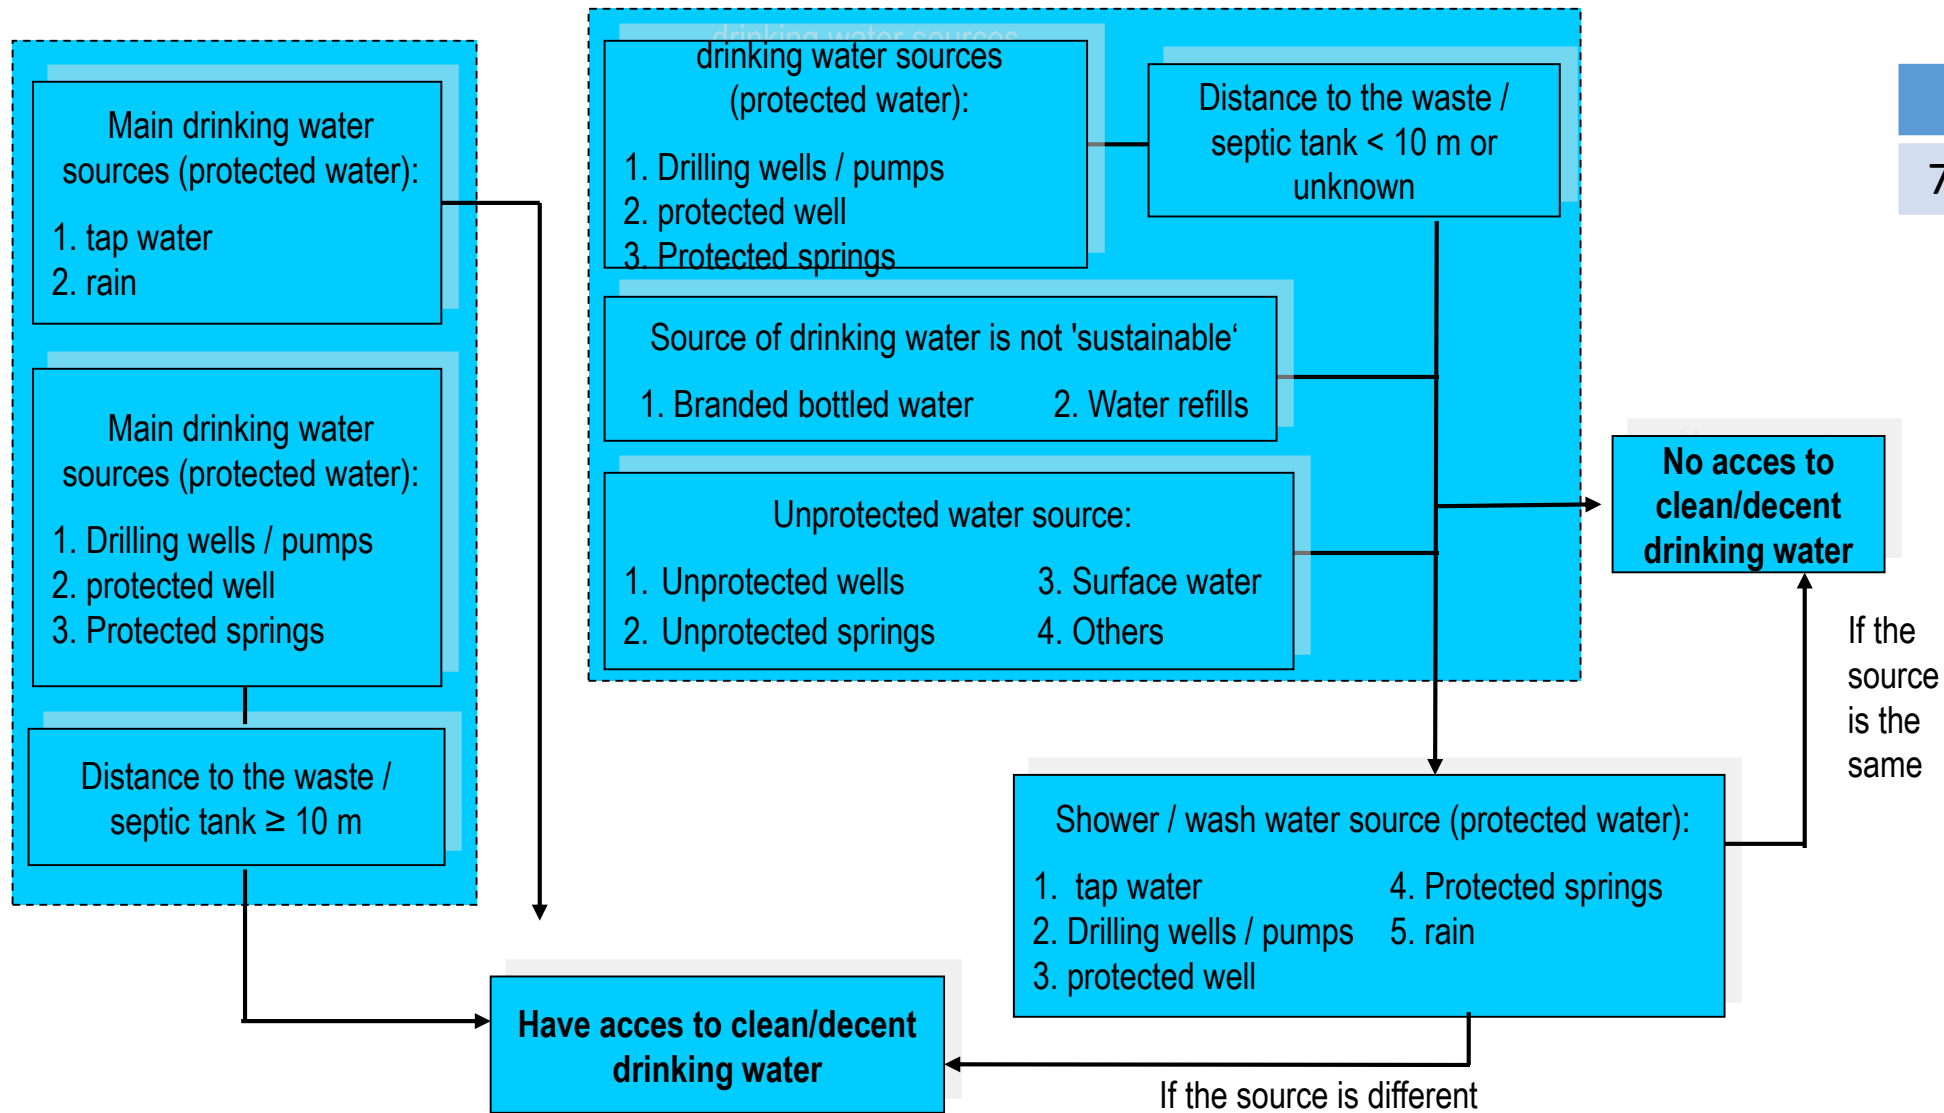

1611A. WHAT THE MAIN SOURCE OF DRINKING WATER FOR MEMBERS OF YOUR HOUSEHOLD?

1. Branded Bottled Water
2. Refill Water
3. Tap Water
4. Artesian Well/pump
5. Protected Wells
6. Unprotected Wells
7. Protected Spring
8. Unprotected Spring
9. Surface Water (as river, lake/ reservoir, pool, irrigation)
10. Rainwater
11. Other water

1611B. [If 1611.A = 4, 5, 6, 7, 8, (well/pump/springs)], HOW FAR IS IT FROM THE NEAREST FINAL DISPOSAL SITE OF FAECES??

- | | |
|----------------|---|
| 1. < 10 m | 1 |
| 2. ≥ 10 m | 2 |
| 3. Do not know | 8 |

DIAGRAM-1: how BPS determine access to clean/decent drinking water

2015	2016	2017
70.97	71.14	72.04

* being used since 2011

6.1.1 (a) Proportion of households having access to clean drinking water (%)

Indonesia

By Area Type, 2017

By Province, 2017

6.2.1(a) Proportion of population having access to hand-washing facility with soap and water

Concept & Definition:

The proportion of the population having access to hand washing facilities with soap and water is the ratio between number of households with hand-washing facilities with soap and water with the total number of households

Data Source:

National Socio-economic Survey / Susenas - BPS

Formula:

$$\text{PPCSA} = \frac{\text{RTCSA}}{\text{JRT}} \times 100\%$$

Remarks:

PPCSA = Percentage of population with hand-washing facilities with soap and water

RTCSA = Number of households with hand-washing facilities with soap and water

JRT = Number of households

6.2.1(a) Proportion of population having access to hand-washing facility with soap and water

Question in Susenas Questioner

1617A. MAY I SEE A PLACE WHERE ORDINARY MEMBERS OF YOUR HOUSEHOLD WASH HANDS??

- | | |
|-------------------------------|---|
| 1. Yes,inside the house | 1 |
| 2. Yes,outside the house | 2 |
| 3. No hand washing facilities | 3 |
| 4. Not allowed to see | 4 |

1617B. Observe the availability of water in hand washing!
(Verification by checking faucet/pump, or basins, bucket, water containers, or the like).

- | | |
|----------------------|---|
| 1. Available water | 1 |
| 2. Unavailable water | 5 |

1617C. Check the availability of soap, detergent, or liquid antiseptic hand washing!

- | | |
|---|---|
| 1. Provided a special soap for hand washing | 1 |
| 2. Provided antiseptic | 2 |
| 3. Provided bath soap | 3 |
| 4. Provided laundry soap/detergent | 4 |
| 5. Provided dish soap | 5 |
| 6. There isn't | 6 |

6.2.1(a) Proportion of population having access to hand-washing facility with soap and water

Indonesia, 2017

68,16

By Area Type, 2017

By Province, 2017

6.2.1(b) Proportion of households having access to proper/decent sanitation

Concept & Definition:

Proper/decent sanitation facilities are sanitation facilities that meet health requirements, including toilets using swan necks, landfills using septic tanks or wastewater treatment systems, and sanitation facilities are used by their own households or in conjunction with certain other households.

Data Source:

National Socio-economic Survey / Susenas KOR - BPS

Formula:

$$\text{PLSL} = \frac{\text{JRTSL}}{\text{JRTS}} \times 100\%$$

Remarks:

PLSL : Percentage of households with access to proper/decent and sustainable sanitation services

JRTSL : Number of households with access to decent sanitation facilities.

JRTS : Total number of households

6.2.1(b) Proportion of households having access to proper/decent sanitation

Question in Susenas Questioner

1610A: HOW TO USE THE FACILITIES, WHERE DEFECATIONS (LATRINES)?

1. Used households own
2. Used in combination with certain household
3. Latrines are used in general/public
4. Don't use latrines
5. Have No facilities

1610B: (If 1610.A = 1 or 2), WHAT TYPE OF TOILET IS USED BY HOUSEHOLDS?

1. Swan latrine
2. Flushing to pit latrine with slab
3. Flushing to pit latrine without slab
4. Plunged hole/Cubluk

1610D: WHERE IS THE PLACE OF FINAL DISPOSAL OF FECES?

1. Septic tank
2. WWTP
3. Pond / rice field / river / lake / sea
4. Land hole
5. Beach / Fields / Gardens
6. Others

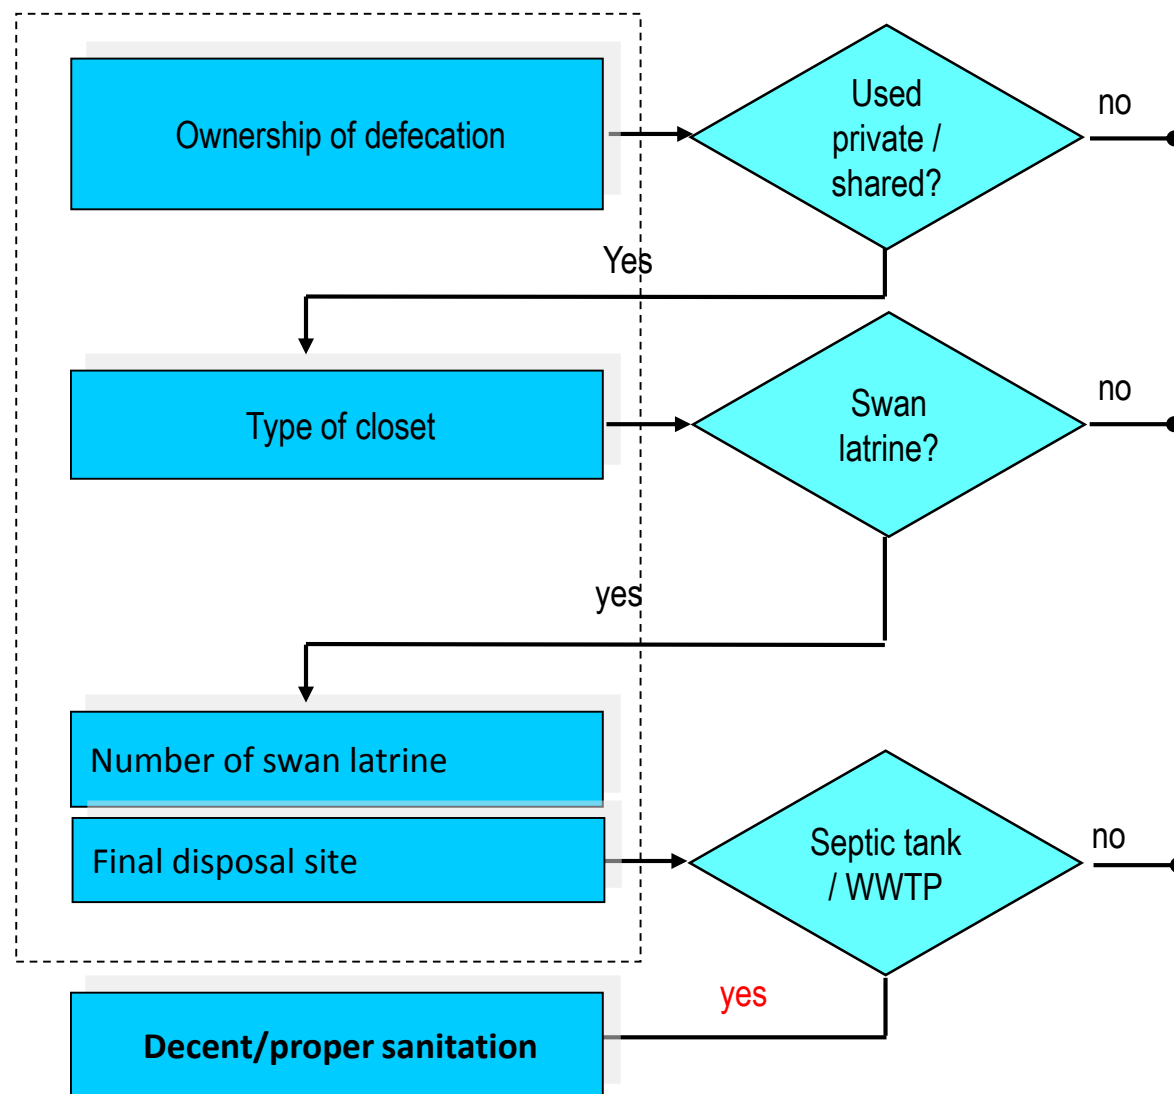

Diagram 2 How BPS determine decent/proper sanitation

6.2.1(b) Proportion of households having access to proper sanitation

Indonesia

By Area Type, 2017

By Province, 2017

- Susenas only provides 3 WASH Indicator
- Adding new question into Susenas is not a wise decision → due to respondent burden (1 interview +/- 2 hours)
- Adding a new survey, can be expensive
- Other WASH Indicator (based on our national SDGs metadata) supposed to be provided by other ministries → needs massive coordination & communication
